Application Number: 09/733,859

Examiner: Nguyen, Dustin

Applicant(s): Ching-Fang Lin

Group Art Unit: 2154

Filing Date: 12/08/2000

Title: Portable Multi-Tracking Method and System

Date: 04/20/2006

DECLARATION UNDER RULE 132

Honorable Commissioner for Patents,
P.O. Box 1450,
Alexandria, VA 22313-1450

Sir:

I, Ching-Fang LIN, hereby attest as follows:

I am the sole-named inventor of the above-identified U.S. Patent Application Serial No. 09/733,859, entitled "Portable Multi-Tracking Method and System" (the '859 application).

Commercial Success

My company has had contracts with the US ARMY and other government organizations embodying the subject of the '859 application. The coremicro Palm Navigator containing the "portable multi-tracking method and system" is contracted with the US ARMY and other government organizations. The sample awards are shown as follows:

(1) US ARMY ARDEC Contract No. W15QKN-04-C-1129: The cover page shows award date of August 26, 2004 and contract price. There are two units of coremicro Palm Navigators containing the "portable multi-tracking method and system" technology delivered to the US ARMY according to this contract on February 26, 2005, wherein one of them is delivered on July 26, 2005 and another one is delivered on November 25, 2005 to US ARMY ARDEC.

(2) Contract No. W15QKN-04-C-1129: Statement of Work shows the use and application of the "portable multi-tracking method and system" technology.

(3) US ARMY ARDEC Contract No. W15QKN-04-C-1003: The cover page shows award date of October 21, 2003 and contract price. There are three units of the coremicro Palm Navigators containing the "portable multi-tracking method and system" technology delivered to the US ARMY according to this contract on June 21, 2004, wherein one of them is delivered on May 23, 2005 to US ARMY ARDEC.

(4) The Final Software Users Manual of the US ARMY ARDEC Contract No. W15QKN-04-C-1003, Pages 1 and 2 (First delivered on Jan 4, 2004 and the final on Sept 2005) show the use and application of the technology of the '859 application.

(5) US ARMY ARDEC Contract No. W15QKN-06-C-0085: The cover page shows award date of January 06, 2006 and contract price. There are eight units to be delivered.

(6) Software Design Description of the US ARMY ARDEC Contract No. W15QKN-06-C-0085, Pages 1 and 2, shows the use and application of the technology of the '859 application.

(7) Software Product Specification of the US ARMY ARDEC Contract No. W15QKN-06-C-0085, Page 1, shows the use and application of the technology of the '859 application.

(8) US Marine Corps Contract No. M67854-00-C-0023: The cover page shows award date of October 01, 2001 and contract price.

(9) US Marine Corps Contract No. M67854-00-C-0023: Data Rights states the "Identification and Assertion of USE, Release, or Disclosure Restrictions for existing technology." Item No. 3 in "Technical data or Computer Software to be Furnished with Restriction" clearly shows the developed product is "Portable Multi-Tracking Processing" which is using 100% of the technology of the '859 application. There are five units of coremicro Palm Navigators containing the "portable multi-tracking method and system" technology delivered to the US Marine Corps according to this contract.

In my opinion, an important reason for the commercial success of the portable multi-tracking method and system is the structural configuration which has been expressed in the '859 application. Therefore, the subject matter of the portable multi-tracking method and system exhibits relative to others available in the market is an important reason for the commercial success of the portable multi-tracking method and system.

All statements made of my own knowledge are true and all statements made on information and believed to be true. I acknowledge that willful false statements and the like are punishable by fine, imprisonment, or both under 18 U.S.C. 1001 and may jeopardize the validity of the application or any patent issuing thereon.

By: 
Ching-Fang Lin

DISTRIBUTION STATEMENT B - DISTRIBUTION AUTHORIZED TO U.S. GOVERNMENT AGENCIES ONLY (CONTAINS PROPRIETARY INFORMATION). OTHER REQUESTS FOR THIS DOCUMENT SHALL BE REFERRED TO THE UNITED STATES ARMY ARMAMENT RESEARCH, DEVELOPMENT AND ENGINEERING CENTER, AND AMERICAN GNC CORPORATION, 888 EASY STREET, SIMI VALLEY, CA 93065-1812.

THESE SBIR DATA ARE FURNISHED WITH SBIR RIGHTS UNDER CONTRACT NO. W15QKN-04-C-1003 FOR A PERIOD OF 4 YEARS AFTER ACCEPTANCE OF ALL ITEMS TO BE DELIVERED UNDER THIS CONTRACT. THE GOVERNMENT AGREES TO USE THESE DATA FOR GOVERNMENT PURPOSE ONLY, AND THEY SHALL NOT BE DISCLOSED OUTSIDE THE GOVERNMENT (INCLUDING DISCLOSURE FOR PROCUREMENT PURPOSE) DURING SUCH PERIOD WITHOUT PERMISSION OF THE CONTRACTOR, EXCEPT THAT, SUBJECT TO THE FOREGOING USE AND DISCLOSURE PROHIBITIONS, SUCH DATA MAY BE DISCLOSED FOR USE BY SUPPORT CONTRACTORS. AFTER THE AFORESAID 4-YEAR PERIOD THE GOVERNMENT HAS A ROYALTY-FREE LICENSE TO USE, AND TO AUTHORIZE OTHERS TO USE ON ITS BEHALF, THESE DATA FOR GOVERNMENT PURPOSE, BUT IS RELIEVED OF ALL DISCLOSURE PROHIBITIONS AND ASSUMES NO LIABILITY FOR UNAUTHORIZED USE OF THESE DATA BY THIRD PARTIES. THIS NOTICE SHALL BE AFFIXED TO ANY REPRODUCTIONS OF THESE DATA, IN WHOLE OR IN PART.

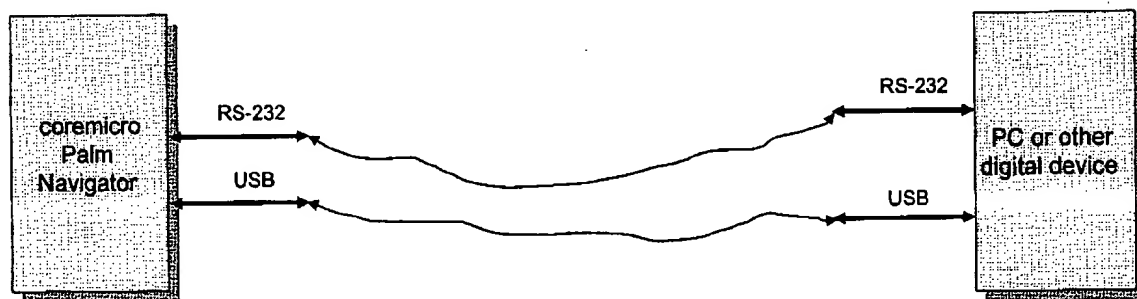

252.227-7013 RIGHTS IN TECHNICAL DATA—NONCOMMERCIAL ITEMS: LINUX API FOR RS-232 AND USB.

American GNC Corporation Proprietary Information

Software Users Manual

The system software resides in the robot's onboard computer, or in the host computer, or in a PC for a test system. Its functions are to control the operation of the whole robot system, such as communication with the coremicro Palm Navigator 3, guidance and control of the robot.

One of the functions of the software is to control the operation of the coremicro Palm Navigator 3 through a USB port or a RS232 port, as shown in the following figure. The software will be first developed in Windows and converted to Linux later.

Included in this software are a suite of APIs (application program interface) that can be used by the customer for applying the coremicro Palm Navigator 3 in other applications.

As the project proceeds, more functions will be added to the software and this document will be updated every 6 months.

American GNC Corporation Proprietary Information

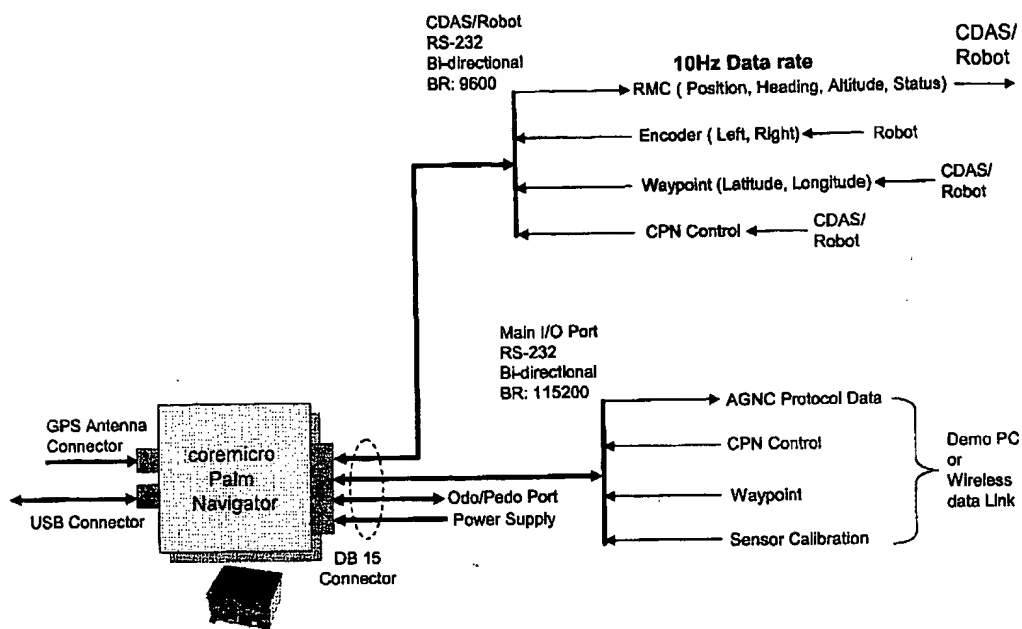

Figure 0-1 Interface Functions of the coremicro Palm Navigator

Figure 0-1 depicts a summary of the current interface functions of the coremicro Palm Navigator. The user can use either the CDAS/Robot port or the main I/O port for data communication, unit control, or system calibration.

RMC output format

The following are RMC message samples.

```
$GPRMC,184141,A,3400.0002,N,11800.0034,W,,331.3,150905,013.1,W,0,0122.2*7F\r\n
$GPRMC,184141,A,3400.0002,N,11800.0035,W,,332.9,150905,013.1,W,0,0122.8*7D\r\n
$GPRMC,184141,A,3400.0002,N,11800.0035,W,,331.3,150905,013.1,W,0,0122.8*74\r\n
```

It can be seen that the range of the heading is from 0 to 359.9 degrees. The leading zero is sent, so that the heading field is always 5 chars. This is easier for the decoding programming. The heading field is valid even when the GPS validity field is a "V". The heading field is valid as long as it is a valid decimal digital string. If it is not a decimal digital string, it is then used as an indicator of the system status.

Software Design Description (Draft)

This Software Design Description establishes the software design for the “Wireless Wide Area Networked Precision Geolocation for Combat Decision Aids System” project. In this project, multiple coremicro® Palm Navigator units will be used in the “Wireless Wide Area Networked Precision Geolocation for Combat Decision Aids System”. A software system --- System Control Software --- will be implemented, updated and used as a test and evaluation tool for the project, as shown in Figure 1. The main functions of this System Control Software include: support test and demonstration of the coremicro® Palm Navigator units, provide user interface for the units, data display and storage, support integration test with CDAS, demonstration and monitoring, and in-field system data exchange, etc.

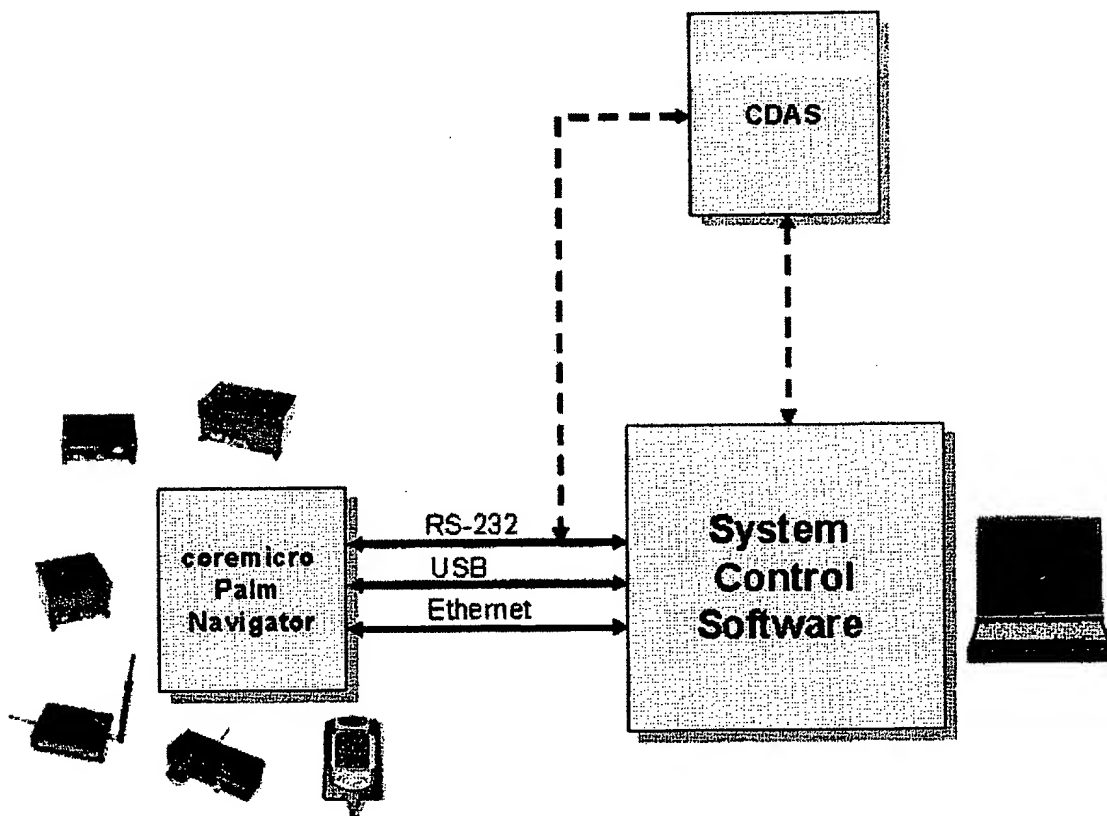

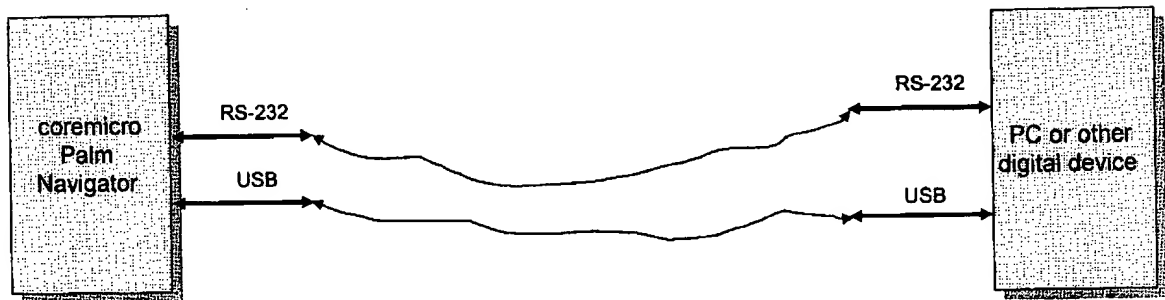

Figure 1 Application of the System Control Software

American GNC Corporation Proprietary Information

The system software resides in the robot's onboard computer, or in the host computer, or in a PC for a test system. Its functions are to control the operation of the whole robot system, such as communication with the coremicro Palm Navigator, guidance and control of the robot.

One of the functions of the software is to control the operation of the coremicro Palm Navigator 3 through a USB port or a RS232 port, as shown in the following figure. The software will be first developed in Windows and converted to Linux later.

Included in this software are a suite of APIs (application program interface) that can be used by the customer for applying the coremicro Palm Navigator 3 in other applications.

As the project proceeds, more functions will be added to the software and this document will be updated every 6 months.

Multiple Tracking Software

The PC based multiple tracking software has been used for coremicro Palm Navigator demonstration. The configuration of the RF data link was improved to increase the tracking range of the system. An interface was added to the coremicro Palm Navigator that can send the position data to a map system and display the unit position on the map in real-time.

The Improvements of PC based multiple tracking software include:

- The display has zoom-in and zoom-out functions for tracking display.
